DETAILED ACTION

Election/Restrictions

This application is in condition for allowance except for the presence of claims 8-33 directed to inventions non-elected without traverse. Accordingly, claims 8-33 have been cancelled.

Applicant note: due to the allowability of claim 1 as detailed below, previously withdrawn claims 6 and 7 are hereby rejoined and also allowed.

Information Disclosure Statement

The references cited within the IDS document submitted on September 12, 2006 have been considered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 8-33.

Art Unit: 2812

(Applicant note: independent method claim 8 does not recite the allowable features of claim 1. Independent claims 13 and 20 are device claims. Claims 11, 12, 26 and 30 are product-by-process claims. Although dependent upon allowed claim 1, the claims do not necessarily contain the distinct allowable features of claim 1 since the resulting product does not necessarily require the method steps to arrive at the product.)

Allowable Subject Matter

Claims 1-7, 34 and 35 are allowed.

The following is an examiner's statement of reasons for allowance. The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding a method of manufacturing a semiconductor device having electrodes which penetrate the semiconductor substrate, particularly characterized by the cross-sectional area of the distal end portion of the electrode being equal to or smaller than that of the cross-sectional area of the electrode at the active surface of the substrate, as recited in independent claim 1. Claims 2-7, 34 and 35 are dependent upon claim 1. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The following references are cited as being particularly relevant to the applicant's invention: Yamaguchi (6,916,725) and Miyazawa (7,029,937).
